Andhra University College Of Engineering For Women, Visakhapatnam **66.4 percent**
- +2 examination** **2015- 2017**
Sri Chaitanya Junior College, Visakhapatnam **92.4 percent**
- High school examination** **2014 - 2015**
Sri Ramakrishna School, Visakhapatnam **92 percent**

Personal Projects.....

- Streaming Platform**
I built with React and Redux . It describes about streaming movies. It contains Tv series and movies. It allows users to select the movie and see the description and cast and watch the clips. It works same with Tv series. There is an search option so that we can search needed one.
- Jobster Website**
I built this with React js. It allows users to add a job as well as find a job. We can see the monthly applications and the jobs which are declined, pending. WE can schedule an interview. There will be a serach option so that we can find a suitable one.
- Comfy Sloth**
This an E-Commerce shopping website. In this we can view all kind of products we need. There is option for selecting the company we want and the color and price range also. We can add the products to cart and if we don't want we can delete them from cart. When we click on the product details, we can view

description of that product.

Technical and Personal skills
